

ACOTE EVIDENCE ARCHITECTURE

Designed for Absolute ACOTE Compliance.

PraxisSimTM automates the systematic data collection required to prove your program satisfies mandatory educational outcomes — eliminating the manual burden of accreditation evidence compilation. Every student submission generates structured, timestamped, exportable evidence mapped directly to ACOTE accreditation standards.

3 ACOTE Standards B.4.10 · B.5.1 · B.7.4	100% Audit Trail Coverage Every submission logged & timestamped	A.2.2 Systematic Assessment Programmatic trajectory analytics	<90s Faculty Eval Cycle 3-axis micro-rubric per entry

ACOTE STANDARDS COMPLIANCE MAPPING MATRIX

4 mandatory standards — automated evidence generation for each. All submissions are structured, timestamped, and exportable for ACOTE site visits and self-study cycles.

ACOTE Standard	Educational Requirement	PraxisSim TM Automation Solution	Status
B.4.10 Documentation	Entry-level competence in documenting occupational therapy services for reimbursement in a variety of practice settings.	De-Identified Audit Trails — Generates a secure, exportable electronic record of all student SOAP notes, progress notes, and reassessment submissions — with faculty evaluation scores and timestamp data for each entry.	LIVE
B.5.1 Clinical Reasoning	Demonstrate clinical reasoning to choose and justify relevant interventions and activities that meet the needs of the client/patient.	Intervention Justification Blocks — Enforces structured entry prompts that require students to explicitly defend the medical necessity and OTPF-4 rationale of every clinical action before submission can be completed.	LIVE
B.7.4 Supervision	Deliver structured administrative and clinical supervision tracking models compliant with applicable laws and standards of practice.	Supervisor Calibration Grid — Exposes a secure faculty portal connecting student documentation portfolios directly to assigned graders — with revision request workflows and full interaction audit logs.	LIVE
A.2.2 Assessment	Perform ongoing, systematic data collection and analysis to assess student learning outcomes and program effectiveness.	Programmatic Trajectory Analytics — Provides aggregate cohort-level metrics proving clinical reasoning growth across an entire student cohort — with longitudinal comparison data exportable for accreditation self-study documentation.	IN DEV

STATUS KEY:	LIVE — Feature fully operational and available to pilot institutions	IN DEV	In active development — available to pilot institutions before end of pilot term
-------------	--	--------	--

FERPA Compliant	Zero PHI Stored	No EHR Integration	ACOTE Aligned	Title IV Eligible	No IT Provisioning
-----------------	-----------------	--------------------	---------------	-------------------	--------------------

PILOT PROGRAM COMMERCIAL MODEL

Pilot Duration	60 days — zero cost to institution	Pilot Fee Commitment	None during pilot term
Post-Pilot Fee	\$45.00 per student per semester — Digital Course Material (Inclusive Access)	Liability Cap	\$100.00 USD per executed pilot agreement
IT Provisioning	None required — cloud-native, browser-based platform	Title IV Eligible	Yes — classified as Digital Course Material under Inclusive Access
LMS Integration	Canvas and Banner compatible via standard LTI hooks	Grace Period	14-day grace period during paid license transition
